

Hand sanitizer for hospital staff use

\$ 4.99

\$ 50/36 pack

\$ 2.99

The lack of hand washing in American hospitals has caused MRSA (Methicillian-Resistant Staphylococcus Aureus) to kill 95,000 people every year. The current portable hand-sanitizers hold very smal amounts of solution and can be easily forgotten in a lab coat or pocket. The target market is huge, stretching from doctors to nurses, to orderlys and housekeeping, in any healthcare environment.
